Paraná, Brazil

TECHNICAL SKILLS

Languages: English and Portuguese
Software Languages: Javascript/Typescript, SQL, HTML, CSS, Ruby, C, PHP.
Technologies/Frameworks: React, React Native, Next.js, Node, Express, Axios, WordPress, Material UI, Mantine, Ant Design, Redux, NestJS, Go.
Developer Tools: Git, Docker, Visual Studio, Dev C++, Firebase, Figma, Adobe XD, Jira, Trello, Neovim.

EXPERIENCE

I've learned to adapt to different challenges, whether developing applications or teaching programming. Flexibility and attention to detail have been key in delivering practical solutions. Every project has been an opportunity to stay open to new ideas and continue improving.

Fiap Treinamentos

Instructor   *Jan 2024 – Current*

- Currently teaching front-end development to over 60 students, notably from **Corporate University of Banco do Nordeste** and others.
- Live online courses via Zoom and MS Teams. Technologies include **React**, **Next.js**, and **React Native** using **Typescript** starting from scratch.
- Learned to research solid information, assist people with questions and convey knowledge clearly and concisely.

Hcode Consultoria e Tecnologia

Full-Stack Developer and Instructor   *Jun 2020 – Current*

- I have been involved in real projects from client interaction and **UI/UX** design to product delivery. Some examples are SPClick and RJClick which can be downloaded on app stores.
- I have been developing internal systems using **React**, **Next.js**, **Mantine UI** and **Axios** on the front-end, as well as **Node.js**, **NestJS**, **Prisma**, **TypeORM** and **MySQL** on the back-end.

Technical Support   *Jun 2020 – Jun 2022*

- Assisted students in the various taught technologies, clearing doubts, and helping them solve their errors.
- Some of the technologies were **Typescript**, **PHP**, **MySQL**, **NestJS**, **Vue**, **Bootstrap**, **jQuery** and **Node.js**.
- I learned to deal with the customer, solve problems and research to find solutions.

PERSONAL PROJECTS

To learn more about my work and explore my projects in detail, please refer to my my personal website. Throughout my journey, I have developed several projects using technologies such as React, React Native, Next.js, Node, Express, Axios, WordPress, Material UI, Mantine, Ant Design, Redux, NestJS, Go, TailwindCSS, MongoDB, Ruby, and others, always focusing on building efficient and scalable solutions. I enjoy creating solutions to problems I encounter, finding ways to address challenges in both development and design.

EDUCATION

Unicesumar

Bachelors Degree on Software Engineering   *Jan 2022 – Dez 2025*
Associate Degree on Technology of Systems   *Mar 2024 – Mar 2025*

OTHER ABILITIES

- I participated in **Open Source projects**, using the **GitHub** workflow to contribute to the **Mantine UI** library.
- Teaching and working with people throughout my career helped me develop strong communication and team skills..
- Passionate about my craft, love doing general software development and enhancing my **Neovim** setup.
